SUBJECT INDEX

A Philosophical Approach to Anaesthesia, SCHOU, J., (R) 727–728
A Synopsis of Intensive Care Medicine, WORTHLEY, L. I. G., (editor), (R) 727

Age factors. Effects of midazolam and diazepam as premedication on heart rate variability in surgical patients, IRIE, T., et al., 479–483
—, Mivacurium in young adult and elderly patients, PLATT, M. W., et al., (ARS) 263P
—, Neuro muscular and haemodynamic effects of mivacurium in elderly and young adult patients, MADDINEN, V. R., et al., 608–612
—, Pharmacodynamics of 1/8W9 in young and elderly patients, SOROOSHIAN, S. S., et al., (ARS) 275–276P
Airway. In-vitro comparison of the pharmacodynamics of ketamine in neonatal and adult porcine airways, HODGSON, P. E., et al., (C) 714–715P
Airway complications. Tracheal rupture after tracheal intubation, VAN KLEINENBERGH, J., et al., 550–551
Anaesthesia. Sensitivity of upper airway reflexes in cigarette smokers: effect of abstinence, ERKINS, R. J., et al., 298–302
Anaesthesia, 2nd Edn, NIMMO, W. S., et al., (editors), (R) 870–871
—, Postnatal survey of paediatric practice and training among consultant anaesthetists in the UK, STODDART, P. A., et al., 559–563
—, Record-keeping in anaesthesia: what the law requires, POWERS, M. J. 22–24
Anaesthesia, day-case. Gynaecological laparoscopy—day-case or overnight stay? TALLE, K. F. H., et al., (ARS) 270P
—, Minor morbidity after day-case anaesthesia: propofol-isoﬂurane vs propofol-enturane, HUGHS, D., et al., (ARS) 274P
—, Recovery proﬁles after outpatient anaesthesia: sevoflurane vs desflurane, NATHANSON, M. H., et al., (ARS) 722P
Anaesthesia, depth. A measure of consciousness and memory during isoflurane administration: the coherent frequency, SAPPINORD, D. J., et al., (C) 119
—, A measure of consciousness and memory during isoflurane administration: the coherent frequency, TOOLEY, M. A., et al., (C) 119
—, Awareness and its medicolegal implications, PAYNE, J. P. 38–45
—, Continuous monitoring of depth of sedation by EEG spectral analysis in patients requiring mechanical ventilation, SPENCER, E. M., et al., 649–654
—, Perception and memory during general anaesthesia, JONES, J. G. 31–37
—, The pattern of litigation against anaesthetists, AIKINHAH, A. 10–21
Anaesthesia for Thoracic Surgery, 2nd Edn, GOTHARD, J. W. W., (editor), (R) 728
Anaesthesia, general. Functional recovery of stunned myocardium is greater with halothane than fentanyl anaesthesia in dogs, WHITE, J. L., et al., 214–219
—, Record-keeping in anaesthesia: what the law requires, POWERS, M. J. 22–24
Anaesthesia, neurosurgical. Adrenaline-induced hypotension in neurosurgery, AGARWAL, A., et al., (C) 277
—, Adrenaline-induced hypotension in neurosurgery, PHILLIPS, S., et al., (C) 277–278
—, Prevention of venous air embolism in paediatric neurosurgical procedures performed in the sitting position by combined use of MAST suit and PEEL, MAYER, P. G., et al., 795–800
Anaesthesia, obstetric. Combined spinal–extradural analgesia in the delivery room, ELOND, I., (C) 426
—, Combined spinal–extradural analgesia in the delivery room, STACZY, R., (C) 426–427
—, Comparison of invasive and non-invasive measurement of continuous arterial pressure using the Finapres in patients undergoing spinal anaesthesia for lower segment Caesarean section, WILLIS, M. P., et al., 738–743
—, Extradural analgesia in labour: complications of three techniques of administration, TAN, S., et al., 619–623
—, Menigitis after combined spinal-extradural anaesthesia in obstetrics, HARDING, S. A., et al., 545–547
—, Overpressure isoflurane at Caesarean section: a study of isoflurane concentrations, GIRLING, K. J., et al., (C) 277
—, Overpressure isoflurane at Caesarean section: a study of isoflurane concentrations, MCCLEIRB, A., (C) 277
—, Posterior column sensory impairment during ambulatory extradural analgesia in labour, BURG, D., et al., 540–542
—, Problems with regional anaesthesia: hazards or negligence? MACDONALD, R. 64–68
—, Ropivacaine (Org 9426) for Caesarean section, ABOULESS, E., et al., 336–341
—, Speed of onset of sensory block for elective extradural Caesarean section, CLARK, V., et al., (C) 866
—, Speed of onset of sensory block for elective extradural Caesarean section, PAYNE, J. P., et al., (C) 865–866
—, Uteroplacental and fetal haemodynamics and cardiac function of the fetus and newborn after crystalloid and colloid preloading for extradural Caesarean section anaesthesia, KAREN, J., et al., 751–757
Anaesthesia, paediatric. Assessment of intubating conditions in children after induction with propofol and varying doses of alfentanil, MCNAGHY, P., et al., 596–599
—, Auditory evoked response and paediatric anaesthesia, O’KELLY, S. W., et al., (ARS) 719–720P
—, Comparison of the effects of sevoflurane and halothane on the quality of anaesthesia and serum glutathione transferase alpha and fluoride in paediatric patients, TAYLADDEN, T., et al., 590–595
—, Effect of humidification on inhalation induction with isoflurane in children, McANUFF, G. L., et al., 587–589
—, Effects of oral nizatidine on preoperative gastric fluid pH and volume in children, MIKAWA, K., et al., 600–604
—, Increasing the length of the expiratory limb of the Ayre’s T-piece: implications for remote mechanical ventilation in infants and young children, JACKSON, E., et al., 154–156
—, Pharmacodynamics of mivacurium in infants, MERETOJA, O. A., et al., 490–493
—, Pharmacodynamics of mivacurium in infants, MERETOJA, O. A., et al., (e) 872
—, Post-sacral extradural catheter abscess in a child, EMMAI宽, E. R. 548–549
—, Preoperative fasting for paediatric anaesthesia, PHILLIPS, S., et al., 529–536
—, Synergism between atracurium and vecuronium in infants, NAKAYAMA, K., et al., 166–169
—, Synergism between atracurium and vecuronium in infants, MERETOJA, O. A., et al., 605–607

Functional recovery of stunned myocardium is greater with halothane than fentanyl anaesthesia in dogs, White, J. L., et al. 214-219.

Memory for auditory material presented during anaesthesia, Bonnacker, A. E., et al. 122-123.

Propofol and fentanyl anaesthesia in patients with low cardiac output state undergoing cardiac surgery: comparison with high-dose fentanyl anaesthesia, Bell, J., et al. 166-169.

Selective induction in leucocyte antigen expression after high-dose fentanyl administration at cardiac surgery, McBride, W. T., et al. 717P.

The extradural sieve, Tihan, B., 431.

Tracheal intubation without neuromuscular block in children, Steven, M., et al. 432.

Extradural sufentanil by patient-controlled analgesia or extradural Caesarean section anaesthesia, Kariinen, J., et al. 277.

Antagonists neuromuscular block, neostigmine, Antagonizing residual neuromuscular block with neostigmine and atropine, Goudouzian, N. G., et al. 725.

Comparison of neostigmine-induced recovery with spontaneous recovery from mivacurium-induced neuromuscular block, Baurain, M. J., et al. 791-794.

Neostigmine and postoperative nausea, Bore, A. J., 726.

Neostigmine and postoperative nausea, Smith, I., 725.

Neostigmine and postoperative nausea, Williams, P. L., 725-726.

Morphine metabolites after i.v. diamorphine and morphine in patients with renal failure, Marsh, D. F., et al. 709-710P.

Analgesics opioid, remifentanil, Remifentanil reduces auditory and somatosensory evoked responses during isoflurane anaesthesia in a dose-dependent manner, Newton, D. E. F., et al. 720P.

Extradural sufentanil by patient-controlled analgesia or nurse-administered compared with optimal morphine in a high dependency unit: effects on oxygenation and pain relief after abdominal surgery, Slade, J. M., et al. 634-638.

Morphine metabolites after i.v. diamorphine and morphine in patients with renal failure, Marsh, D. F., et al. 709-710P.

Blood Loss and Shock, Influence of different i.v. propofol on the microcirculation, Schmidt, H., et al. 273-274P.

Blood, replacement, Effect of Haemaccel in the pump prime on ionized plasma calcium and plasma phosphorus concentrations during cardiopulmonary bypass, Skelly, A. M., et al. (ARS) 717P.

Blood, transfusion, Consensus statement on red cell
Complications, hypertension, Oral clonidine premedication attenuates the hypertensive response to ketamine, TANAKA, M., et al. 758-762
—, Resistant hypertension and preoperative silent myocardial ischaemia in surgical patients, ALLMAN, K. G., et al. 574-578
Complications, hypotension, Methylmethacrylate bone cement does not release histamine in patients undergoing prosthetic replacement of the femoral head, MITSHUNATA, H., et al. 779-781
Complications, hypothermia, Effect of hypothermia on the in vitro potencies of neuromuscular blocking agents and on their in vivo actions, Effects of prewarmed fluids from humans susceptible to malignant hyperthermia ischaemia in surgical patients, ALLMAN, K. G., et al. 758-762
Complications, hypoxaemia, Arterial oxygen saturation during induction of anaesthesia and laryngeal mask insertion in children: prospective evaluation of two techniques, LOGAN, A. St C., et al. (ARS) 718-719P
Complications, intubation tracheal, Accidental oesophageal disconnections, ADAMS, A. P. 46-54
—, The Leiden anaesthesia simulator, CHOPRA, V., et al. 293-297
—, Determination of rebreathing for the M & IE Carden Ventmasta during spontaneous ventilation in “A” mode, BARRIE, J. R., et al. (ARS) 275P
—, Fresh gas requirements during spontaneous ventilation, MEARKIN, G., et al. (C) 121-122
—, Increasing the length of the expiratory limb of the Ayr’s T-piece: implications for remote mechanical ventilation in infants and young children, JACKSON, E., et al. 154-156
—, Oxygen uptake during rebreathing in a Mapleson A system, SONI, N., et al. (C) 277
—, Removal of lumbar extradural catheters, Bogy, S. K., et al. 747-750
—, Nasal and oral routes of administration of acetaminophen in the treatment of postoperative pain, ESPOSITO, A. B., et al. 468-469
—, Fresh gas requirements during spontaneous ventilation, MEARKIN, G., et al. (C) 121-122
—, Oxygen uptake during rebreathing in a Mapleson A system, SONI, N., et al. (C) 277
—, Nasotracheal intubating skills, RILEY, B., (C) 122
Complications, trauma, Nasotracheal intubating skills, McHALE, S. P., et al. (C) 428
—, Nasotracheal intubating skills, McHALE, S. P., et al. (C) 428
Complications, thrombosis, Aprotinin therapy, ROYSTON, D., (E) 734-737
Complications, trauma, Nasotracheal intubating skills, McHALE, S. P., et al. (C) 122
—, Nasotracheal intubating skills, RILEY, B., (C) 122

Equipment, cuffs tracheal
Complications, TURP syndrome, Hypertonic saline prehydration before spinal anaesthesia, AGARWAL, A., (C) 429
—, Hypertonic saline prehydration before spinal anaesthesia, BARAKA, A., (C) 429-430
Complications, uraemia, QT dispersion and autonomic function in diabetic and non-diabetic patients with renal failure, KIRVELA, M., et al. 801-804
Complications, uterine rupture, The extradural sieve, GROVES, P. A., et al. (C) 430-431
—, The extradural sieve, TEHAN, B., (C) 431
—, Anaesthetic simulators, ASBURY, A. J., (C) 867
—, Anaesthetic simulators, BYRNE, A. J., (C) 867
—, Does training on an anaesthesia simulator lead to improvement in performance? CHOPRA, V., et al. 293-297
—, Simulators for general anaesthesia, ASBURY, A. J. (E) 285-286
—, The Leiden anaesthesia simulator, CHOPRA, V., et al. 287-292
Crisis Management in Anaesthesiology, GABA, D. M., et al., (R) 568

Current Topics in Intensive Care J, DOBB, G. J., et al., (editors), (R) 433

Day-case Anaesthesia and Sedation, WHITWAM, J. G., (editor), (R) 126

Diabetes, QT dispersion and autonomic function in diabetic and non-diabetic patients with renal failure, KIRVELA, M., et al. 801-804

Drug delivery, A universal nitric oxide delivery system, YOUNG, J. D. 700-702

Drug delivery, transdermal, Prevention of nausea and vomiting with transdermal hyoscine in adults after middle ear surgery during general anaesthesia, HONEVAARA, P., et al. 763-766

Embolism, air, Prevention of venous air embolism in paediatric neurosurgical procedures performed in the sitting position by combined use of MAST suit and PEEP, MEYER, P.-G., et al. 795-800

Enzymes, cholinesterase, Cholinesterase inhibitors do not prolong neuromuscular block produced by mivacurium, FLEMING, N. W., et al. 241-243

Enzymes, cytochrome P450, Midazolam is metabolized by at least three different cytochrome P450 enzymes, WANDEL, C., et al. 658-661

Enzymes, glutathione S-transferase, Comparison of the effects of sevoflurane with those of isoflurane on hepatic glutathione-S-transferase concentrations after body surface surgery, DARLING, J. R., et al. (ARS) 268P

Equipment, breathing systems, Breathing system disconnections, ADAMS, A. P. 46-54
—, Breathing systems: effect of fresh gas flow rate on enflurane consumption, LOGAN, M. 775-778
—, Determination of rebreathing for the M & IE Carden Ventmasta during spontaneous ventilation in “A” mode, BARRIE, J. R., et al. (ARS) 275P
—, Fresh gas requirements during spontaneous ventilation, MEARKIN, G., et al. (C) 121-122
—, Increasing the length of the expiratory limb of the Ayr’s T-piece: implications for remote mechanical ventilation in infants and young children, JACKSON, E., et al. 154-156
—, Oxygen uptake during rebreathing in a Mapleson A system, SONI, N., et al. (C) 277

Equipment, catheters extradural, Withdrawal forces during removal of lumbar extradural catheters, BORY, S. K., et al. 833-839

Equipment, catheters subarachnoid, Assessment of preformed, coiled-tipped, micro spinal catheter, YURINO, M. 655-657
—, Comparison of continuous spinal anaesthesia using a 32-gauge catheter with anaesthesia using a single-dose 24-gauge atrumatic needle in young patients, de ANDRIÉS, J., et al. 747-750

Equipment, cuffs tracheal, Total tracheal obliteration after intubation with a low-pressureuffed tracheal tube, MENSAREL, B. F. 697-699

intraparicardial diaphragmatic hernia, FLYFE, M., et al. 249-251

Complications, hypertension, Oral clonidine premedication attenuates the hypertensive response to ketamine, TANAKA, M., et al. 758-762
—, Resistant hypertension and preoperative silent myocardial ischaemia in surgical patients, ALLMAN, K. G., et al. 574-578
Complications, hypotension, Methylmethacrylate bone cement does not release histamine in patients undergoing prosthetic replacement of the femoral head, MITSHUNATA, H., et al. 779-781
Complications, hypothermia, Effect of hypothermia on the in vitro potencies of neuromuscular blocking agents and on their in vivo actions, Effects of prewarmed fluids from humans susceptible to malignant hyperthermia ischaemia in surgical patients, ALLMAN, K. G., et al. 758-762
Neuromuscular block, mivacurium

Anesthesia in myotonic dystrophy, RUSSELL, S. H., et al., (C) 124

Muscle skeletal, damage, Influence of dose on 894

Myasthenia gravis, Mivacurium in the myasthenic patient, PATTERSON, I. G., et al., 494-498

Nerve, damage, Ketamine and muscle spasm, RICHARD, B. M., et al., (C) 432

Peripheral nerve damage and regional anesthesia, MOORE, D. C., et al., (E) 435-436

Neurovascular, Synergism between atracurium and vecuronium in infants and children during nitrous oxide-oxygen-alfentanil anesthesia, BERGFELD, O. A., et al., (C) 872

Neurovascular block, Antagonism of neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Effect of hypothermia on the in vitro potencies of neuromuscular blocking agents and on their antagonism by neostigmine, AIZUMI, T., et al., 662-666

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P

Intraoperative glycaemic control in non-insulin-dependent and insulin-dependent diabetes, MOORE, D. C., et al., (ARS) 662-666

Neuromuscular block, antagonism, Antagonizing residual neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Neuromuscular block and tourniquets, SHANNON, P. F., (C) 194-198

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P

Intraoperative glycaemic control in non-insulin-dependent and insulin-dependent diabetes, MOORE, D. C., et al., (ARS) 662-666

Neuromuscular block, antagonism, Antagonizing residual neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Neuromuscular block and tourniquets, SHANNON, P. F., (C) 194-198

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P

Intraoperative glycaemic control in non-insulin-dependent and insulin-dependent diabetes, MOORE, D. C., et al., (ARS) 662-666

Neuromuscular block, antagonism, Antagonizing residual neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Neuromuscular block and tourniquets, SHANNON, P. F., (C) 194-198

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P

Intraoperative glycaemic control in non-insulin-dependent and insulin-dependent diabetes, MOORE, D. C., et al., (ARS) 662-666

Neuromuscular block, antagonism, Antagonizing residual neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Neuromuscular block and tourniquets, SHANNON, P. F., (C) 194-198

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P

Intraoperative glycaemic control in non-insulin-dependent and insulin-dependent diabetes, MOORE, D. C., et al., (ARS) 662-666

Neuromuscular block, antagonism, Antagonizing residual neuromuscular block with neostigmine and atropine, GOUDSOUZIAN, N. G., et al., (C) 725

Neuromuscular block and tourniquets, SHANNON, P. F., (C) 194-198

Neuromuscular block, atracurium, Assessment of the interaction between atracurium and suxamethonium at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, OLKKOLA, K. T., et al., 199-203

Haemodynamic effect of mivacurium under high dose fentanyl anaesthesia: comparison with atracurium, LOAN, P. B., et al., (ARS) 715P

Influence of duration of stimulation on measurement of the onset of neuromuscular block, MCCOY, E. P., et al., (ARS) 264P
Neuromuscular block, mivacurium

—, Pharmacokinetics of the three isomers of mivacurium and pharmacodynamics of the chiral mixture in hepatic cirrhosis, Head-Rapson, A. G., et al., (ARS) 611-618P

Neuromuscular block, Org 9426. Dose-response, time course of action and recovery of Org 9426 (rocuronium) in infants during halothane anaesthesia, Leuwer, M., et al., (ARS) 263-264P

Neuromuscular block, priming. Lung volume changes after partial paralysis with vecuronium vs tubocurarine priming in healthy patients, Girling, K. J., et al., (ARS) 263-264P

Neuromuscular block, recovery. Comparison of neostigmine with spontaneous recovery from mivacurium-induced neuromuscular block, Baurain, M. J., et al., 791-794

Neuromuscular block, vecuronium. Dose-response, time course of action and recovery of Org 9426 (rocuronium) in infants during halothane anaesthesia, Leuwer, M., et al., (ARS) 716P

—, Pharmacodynamics of vecuronium in neonates and children, Boyd, A. H., et al., (ARS) 262P

—, Pharmacodynamics of vecuronium for Caesarean section, Abouleish, E., et al., (ARS) 336-341

Neuromuscular block, succinylcholine. Assessment of the interaction between atracurium and succinylcholine at 50% neuromuscular block using closed-loop feedback control of infusion of atracurium, Olokkol, K. T., et al., (ARS) 209-213

—, Influence of dose on succinylcholine-induced muscle damage, Mclooghlin, C., et al., 194-198

—, Succinylcholine-induced myalgia, Doleniska, S., (C) 118

—, Succinylcholine-induced myalgia, Kafhamam, S. (C) 118

—, Tracheal intubation without neuromuscular block, de Castro, J. L. (C) 862

—, Tracheal intubation without neuromuscular block, Steyn, M., et al., (C) 862

—, Tracheal intubation without neuromuscular block in children, Humphries, C., et al., 431-432

—, Tracheal intubation without neuromuscular block in children, Steyn, M., et al., 431-432

—, Use of ketorolac in the prevention of succinylcholine myalgia, Leesoon-Payne, C. G., et al., 788-790

Neuromuscular block, tubocurarine. Lung volume changes after partial paralysis with vecuronium vs tubocurarine priming in healthy patients, Girling, K. J., et al., (ARS) 263-264P

Neuromuscular block, vecuronium. Effect of tetanic stimulation on subsequent train-of-four responses at various levels of vecuronium-induced neuromuscular block, Saitto, Y., et al., 416-417

—, Lung volume changes after partial paralysis with vecuronium vs tubocurarine priming in healthy patients, Girling, K. J., et al., (ARS) 263-264P

—, Muscle blood flow and neuromuscular block, Abdulatif, M., et al., (ARS) 726

—, Muscle blood flow and neuromuscular block, Eger, E. I., (C) 726

—, Neostigmine and postoperative nausea, Boere, A. J., (C) 726

—, Neostigmine and postoperative nausea, Smith, L., (C) 726

—, Varying stimulus train patterns during neuromuscular block with vecuronium and succinylcholine, Pollard, B. J., et al., (ARS) 716P

Neuromuscular transmission, EEMG response in awake subjects, Fisher, W., et al., (ARS) 261-262P

Operating rooms, contamination. Assessment of biochemical and haematological tests as measures of occupational nitrous oxide exposure, Highley, D. A., et al., (ARS) 713P

Operating rooms, personnel. A brief historical review of non-anaesthetic causes of fires and explosions in the operating room, Macdonald, A. G. 847-856

Orthopaedic Anaesthesia, 2nd Edn, Loach, A., (editor), (ARS) 869-870

Oxygen, consumption. Influence of surface cooling and rewarming on whole-body oxygen supply—demand balance, Baraka, A., 418-420

—, Oxygen uptake during rebreathing in a Mapleson A system, Soni, N., et al., (C) 277

Oxygen, inspired concentration. Effects of hyperoxenation on the inspiratory to end-tidal oxygen difference, Bengtsson, J., et al., 140-144

Oxygen, uptake. Effects of hyperoxenation on the inspiratory to end-tidal oxygen difference, Bengtsson, J., et al., 140-144

Pain, Perception and memory during general anaesthesia, Jones, J. G. 31-37

Pain, chronic. Chronic pelvic pain, Campbell, F., et al., (E) 571-573

Pain, postoperative. Extradural infusion analgesia for postoperative pain relief, Leith, S., et al., 552-558

—, Multimodal analgesia before thoracic surgery does not reduce postoperative pain, Kavanagh, B. P., et al., 184-189

—, Pre-emptive analgesia: comparison of preoperative with postoperative caudal block on postoperative pain in children, Holthuizen, H., et al., 440-442

Parasympathetic nervous system, hyoscine. Prevention of nausea and vomiting with transdermal hyoscine butylbromide after middle ear surgery during general anaesthesia, Honkavaara, P., et al., 763-766

Partial pressure, arterial-end-tidal. End-tidal partial pressure of carbon dioxide does not accurately reflect PaCO2 in rabbits treated with acetazolamide during anaesthesia, Lee, T.-S. 225-226

Partial pressure, carbon dioxide. End-tidal partial pressure of carbon dioxide does not accurately reflect PaCO2 in rabbits treated with acetazolamide during anaesthesia, Lee, T.-S. 225-226

Partial pressure, end-tidal. End-tidal partial pressure of carbon dioxide does not accurately reflect PaCO2 in rabbits treated with acetazolamide during anaesthesia, Lee, T.-S. 225-226

Pharmacodynamics, in vitro comparison of the pharmacodynamics of ketamine in neonatal and adult porcine airways, Hodgson, P. E., et al., (ARS) 714-715P

—, Neuromuscular and haemodynamic effects of mivacurium in elderly and young adult patients, Maddineni, V. R., et al., 608-612

—, Pharmacodynamics of mivacurium in infants, Meretoja, O. A., et al., 490-493

—, Pharmacodynamics of mivacurium in infants, Meretoja, O. A., et al., (g) 872

Pharmacokinetics, mivacurium. Clearance of the three isomers of mivacurium in hepatic cirrhosis, Head-Rapson, A. G., et al., (ARS) 262-263P

—, Pharmacokinetics of the three isomers of mivacurium and pharmacodynamics of the chiral mixture in hepatic cirrhosis, Head-Rapson, A. G., et al., 613-618

Pharmacokinetics, rocuronium. Pharmacodynamics of rocuronium in patients with hepatic cirrhosis, Boyd, A. H., et al., (ARS) 262P

Pharmacokinetics, stereoisomers. Clearance of the three isomers of mivacurium in hepatic cirrhosis, Head-Rapson, A. G., et al., (ARS) 262-263P

—, Pharmacokinetics of the three isomers of mivacurium and pharmacodynamics of the chiral mixture in hepatic cirrhosis, Head-Rapson, A. G., et al., 613-618

Pharmacokinetics, succinylcholine. Effects of succinylcholine on intracellular calcium ion concentration of isolated rat skeletal muscle, Hopkins, P. M., (ARS) 717P

Pharmacology, 5-hydroxytryptamine. Recent developments in the physiology and pharmacology of 5-hydroxytryptamine, Hindle, A. T. 395-407

Pain, operating room. Personnel, A brief historical review of non-anaesthetic causes of fires and explosions in the operating room, Macdonald, A. G. 847-856

Orthopaedic Anaesthesia, 2nd Edn, Loach, A. (editor), (R) 869-870

Pretreatment, surface cooling and oxygen uptake during rebreathing in a Mapleson A system, Soni, N., et al., (C) 277

Pulse, oxygen uptake during rebreathing in a Mapleson A system, Soni, N., et al., (C) 277

Pharmacology, domperidone, Domperidone, isoflurane and the ventilatory response to hypoxia, FO0, I. T. H., et al., (ARS) 264-265P.

Pharmacology for Anaesthetists, Cass, N., et al., (R) 283

Pharmacology, midazolam, Midazolam is metabolized by at least three different cytochrome P450 enzymes, WANDER, C., et al., 658-661.

Pharmacology, nitric oxide, A universal nitric oxide delivery system, YOUNG, J. D., 700-702.

Pharmacology, synergism, Recovery characteristics after induction with thiopentone and propofol, RASHQ, S., et al., (ARS) 270P.

Physiology, baricity, Interaction between baricity (glucose concentration) and other factors influencing intratracheal drug spread, SANDERSON, P., et al., 744-746.

Pig, Ascorbate as an endogenous spin trap to detect free radicals during ischemia and reperfusion of isolated working hearts, TEW, D. N., et al., 267-268P.

Physiology, baricity, —,, Cerebral effects of nitric oxide during isoflurane-induced hypotension in the pig, TSUI, Y. C., et al., 667-672.

Pharmacology, midazolam, Midazolam is metabolized by at least three different cytochrome P450 enzymes, WANDER, C., et al., 658-661.

Pharmacology, synergism, Recovery characteristics after induction with thiopentone and propofol, RASHQ, S., et al., (ARS) 270P.

Pharmacology, synergism, Recovery characteristics after induction with thiopentone and propofol, RASHQ, S., et al., (ARS) 270P.

Physiology, baricity, —,, Cerebral effects of nitric oxide during isoflurane-induced hypotension in the pig, TSUI, Y. C., et al., 667-672.

Effects of halothane and diltiazem on L-type calcium channel currents in neostigmine, AZIZ, L., et al., 662-666.

Rabbit, Comparison of clonidine with fentanyl on phrenic nerve activity and their interaction in anaesthetized rabbits, KNOWLES, M. G., et al., 517-521.

Physiology, baricity, —,, Cerebral effects of nitric oxide during isoflurane-induced hypotension in the pig, TSUI, Y. C., et al., 667-672.

Effects of halothane and isoflurane anaesthesia on microcirculatory blood flow in musculocutaneous flaps, SIGNORESD, G. H., et al., 826-832.

Polypeptides, aprotinin, Aprotinin therapy, ROYSTON, D., (E) 734-737.

—in vitro effects of HA-1A (Centoxin) on cytokine production in whole blood from intensive care unit patients, YENTS, S. M., et al., 805-811.

Interleukin-6 and wound healing, ASCHROFT, G. S., et al., (C) 426.

Interleukin-6 and wound healing, CROZIER, T. A., (C) 426.

Potency, anaesthetic, MAC, Effect of fentanyl on awakening concentration of sevoflurane, KATURE, S., et al., 322-325.

Pharmacology, synergism, ED., Interactions between mivacurium and atracurium, NAGUIB, M., et al., 484-489.

Potency, anaesthetic, MAC, Effect of fentanyl on awakening concentration of sevoflurane, KATURE, S., et al., 322-325.

Pregnancy, Gastric emptying is delayed at 8-12 weeks’ gestation, LEVY, D. M., et al., 237-238.

Pig, Ascorbate as an endogenous spin trap to detect free radicals during ischemia and reperfusion of isolated working hearts, TEW, D. N., et al., 267-268P.

Pharmacology, synergism, Recovery characteristics after induction with thiopentone and propofol, RASHQ, S., et al., (ARS) 270P.

Physiology, baricity, —,, Cerebral effects of nitric oxide during isoflurane-induced hypotension in the pig, TSUI, Y. C., et al., 667-672.

Effects of halothane and isoflurane anaesthesia on microcirculatory blood flow in musculocutaneous flaps, SIGNORESD, G. H., et al., 826-832.

Skin, blood flow

Skin, blood flow, Dose-response relation of ornipressin with regard to vasodilatation in human skin, FRUCHSTORFER, H., et al. 220-224

—, Effects of halothane and isoflurane anaesthesia on microcirculatory blood flow in musculocutaneous flaps, SIMPSON, P. M., et al. 826-831

Surgical, Spinal cord, evoked potentials, Spinal cord potential recordings from the extradural space during scoliosis surgery, FUKUJIMA, H., et al. 350-356

Surgical, abdominal, Extradural sufentanil by patient-controlled analgesia or nurse-administered compared with optimal morphine in a high dependency unit: effects on oxygenation and pain relief after abdominal surgery, SLADE, J. M., et al. 634-638

—, Nitrous oxide and bowel function, SIMPSON, P. M., et al., (C) 125

—, Nitrous oxide and bowel function, SIMPSON, P. M., et al., (C) 126-126

Surgical, cardiovascular, Convective warming after hypothermic cardiopulmonary bypass, MOORS, A. H., et al. 750-750

—, Hypoxaemia and myocardial ischaemia on the night before coronary bypass surgery, KEEV, C., et al. 157-161

—, Anaesthesia and myocardial ischaemia on the night before coronary bypass surgery, KEEV, C., et al., (e) 872

—, Plasma endotoxin-like activity during cardiopulmonary bypass, DOYLS, A. R., et al., (C) 428-429

—, Plasma endotoxin-like activity during cardiopulmonary bypass, INABA, H., et al., (C) 429

—, Propofol and fentanyl anaesthesia for patients with low cardiac output undergoing cardiac surgery: comparison with high-dose fentanyl anaesthesia, BELLAMY, M. C., et al., (ARS) 711P

Surgery, day-case, Infusion or inhalation anaesthesia for day-case cystoscopy, HENDLEY, B., et al., (ARS) 711P

—, Morning or afternoon operation for day cases? Postoperative morbidity by domiciliary assessment, SMITH, S. O., et al., (ARS) 711-712P

Surgery, gynaecological, Effect of nabilone on nausea and vomiting after total abdominal hysterectomy, LEWIS, I. H., et al., 244-246

—, Gynaecological laparoscopy—day-case or overnight stay? TEALE, F. P. H., et al., (ARS) 270P

—, Preoperative or postoperative diclofenac for laparoscopic tubal ligation, BOGGY, D. J., et al. 767-770

—, Use of ethanol-tagged glycine irrigation with intermittent expired breath analysis to assess glycine absorption during trans-cervical resection of endometrium, STICKLE, B. R., et al., (ARS) 700P

Surgery, hepatic, Reversal of post-reperfusion coagulopathy by protamine sulphate in orthotopic liver transplantation, BAYLY, P. J. M., et al., 840-842

Surgery, laparoscopy, Antiemetics in laparoscopic surgery, RAPHAEL, J. H., et al., (e) 125

—, Gynaeological laparoscopy—day-case or overnight stay? TEALE, F. P. H., et al., (ARS) 270P

—, Retrobulbar block fails to prevent an increase in serum cortisol concentration on emergence from anaesthesia after cataract surgery, BARBER, J. P., et al. 120-121

—, Retrobulbar block fails to prevent an increase in serum cortisol concentration on emergence from anaesthesia after cataract surgery, SEDDON, S. J., et al. (C) 120

Surgery, orthopaedic, Alkalization of local anaesthetic for intra-articular dilution during arthroscopy, RICHMOND, C. E. 190-193

—, Anaesthesia and tiberosus sclerosis, LEE, J. J., et al. 421-425

—, Intra-articular morphine after arthroscopic knee operation, HEINE, M. F., et al. 413-415

—, Methylocarbamate bone cement does not release histamine in patients undergoing prosthetic replacement of the femoral head, MITSUMATA, H., et al. 779-781

—, Use of adrenaline in knee replacement surgery, THORPE, C. M., et al. 408-410

Surgery, postoperative period, Extravascular infusion analgesia for relief of post-thoracotomy pain relief, LIPPMAAN, M., et al., (ARS) 281

—, Ketorolac and valdecoxib for post-thoracotomy pain relief, POWER, I., et al. (C) 281

—, Multimodal analgesia before thoracic surgery does not reduce postoperative pain, KAVANAGH, B. P., et al. 184-189

—, Postoperative delirium, BROCK-UTNE, J. G., (C) 565

Surgery, transplantation, Changes in cytokines and cardiovascular variables with liver graft preservation in humans, BELLAMY, M. C., et al., (ARS) 717-718P

—, Predictive factors of hyperfibrinolytic activity during liver transplantation in cirrhotic patients, STEIN, A., et al. 645-648

—, Pulmonary gas exchange during orthotopic liver transplantation, PERILL, V., et al. 699-699

—, Reversal of post-reperfusion coagulopathy by protamine sulphate in orthotopic liver transplantation, BAYLY, P. J. M., et al. 840-842

Surgery, urological, Effects of preoperative methoxamine on blood loss and haemodynamic variables during transurethral prostatic resection under spinal anaesthesia, CHAMBERS, F. A., et al. 624-627

Sympathetic nervous system, adrenaline, Adrenaline-induced hypotension in neurosurgery, AGAWAS, A., et al., (C) 277

—, Adrenaline-induced hypotension in neurosurgery, PHILIPS, S., et al., (C) 277-279

—, Effects of hydrocortisone and adrenaline on natural killer cell activity, NOMOTO, Y., et al. 318-321

—, Intra-traheal adrenaline, AHMED, K., et al. (C) 427-428

—, Intra-traheal adrenaline, BASKET, P., et al. (C) 427

—, Intra-traheal adrenaline, MCDONnell, A., et al. (C) 427

Sympathetic nervous system, catecholamines, Influence of serum concentrations of catecholamine and l.v. or volatile anaesthesia on evoked electromyography in the hand, SMITH, D. C., et al. 342-344

Sympathetic nervous system, adrenaline, Co-administration of pethidine and clonidine: a spinal anaesthetic technique for total hip replacement, GRACE, D., et al. 628-633

Sympathetic nervous system, methoxamine, Methods, Effects of preoperative methoxamine on blood loss and haemodynamic variables during transurethral prostatic resection under spinal anaesthesia, CHAMBERS, F. A., et al. 624-627

Sympathetic nervous system, noradrenaline, Comparison of the effects of thiothepone and propofol on the uptake and release of [3H]noradrenaline in normal and SYSY human neuroblastoma cells, LAMBERT, D. G., et al., (ARS) 271P

Sympathetic nervous system, oripressin, Dose-response relation of oripressin with regard to vasocstriction in human skin, FRUCHSTORFER, H., et al. 220-224

Temperature, monitoring, Prevention of hypothermia during hip surgery: effect of passive compared with active skin surface warming, BENNETT, J., et al. 180-183

Temperature, regulation, Convective warming after hypothermic cardiopulmonary bypass, MOORS, A. H., et al. 782-785

The Principles and Practice of Regional Anaesthesia, 2nd Edn, BAYLY, P. J. M., et al., 840-842

Toxicity, Urine concentrating ability after prolonged sevoflurane anaesthesia, HUGHO, H., et al., (C) 277-278

Toxicity, hepatic, Comparison of the effects of sevoflurane with those of isoflurane on hepatic glutathione-S-transferase concentrations after body surface surgery, DARTLING, R., et al. (ARS) 269P

Transfusion, Consensus statement on red cell transfusion, ROYAL COLLEGE OF PHYSICIANS OF EDINBURGH, 857-859

Ventilation, anaesthesics, effects of, Comparison of the effects of doxapram or carbon dioxide on ventilatory frequency and tidal volume during induction of anaesthesia with propofol, SAIJAD, T., (ARS) 265P

—, Ventilatory effects of propofol at varying blood concentrations, SUTCLIFF, N. P., et al., (ARS) 265P

Ventilation, apnoea, Extradural sufentanil by patient-controlled analgesia or nurse-administered compared with optimal morphine in a high dependency unit: effects on oxygenation and pain relief after abdominal surgery, SLADE, J. M., et al. 634-638

Ventilation, arterial oxygen dilution in “trunk” ventilation of circle systems (part 2), WHITE, D. C., et al., (ARS) 720-721P

Ventilation, carbon dioxide response, Effects of surgical stimulation on the apnoea thresholds for carbon dioxide during anaesthesia with sevoflurane, NISHINO, T., et al. 583-586

Ventilation, dead space, Determination of rebreathing for the “A” mode, BARRE, J. R., et al., (ARS) 273P
Ventilation, effects, Effect of ventilation on first-pass pulmonary retention of alfentanil and sufentanil in patients undergoing coronary artery surgery, BOER, F., et al. 458-463

—, Fresh gas requirements during spontaneous ventilation, MEAKIN, G., et al., (C) 121-122

Ventilation, high frequency jet, Auto-PEEP, high frequency jet ventilation, HWANG, N. C., (C) 430

—, Auto-PEEP, high frequency jet ventilation, MANSFIELD, M., et al., (C) 430

Ventilation, hyperventilation, Effects of hyperventilation on the inspiratory to end-tidal oxygen difference, BENGTSSON, J., et al. 140-144

—, Hyperventilation-induced unconsciousness during labour, BURDEN, R. J., et al. 838-839

Ventilation, hypoxic response, Nitrous oxide uptake and elimination, MAPLESON, W. W., (C) 865

—, Nitrous oxide uptake and elimination, MAPLESON, W. W., (C) 865

—, Ventilatory response to hypoxia, GOODMAN, N. W., (C) 565

—, Ventilatory response to hypoxia, LINDAHL, S., (C) 565

Ventilation, positive end-expiratory pressure, Auto-PEEP, high frequency jet ventilation, HWANG, N. C., (C) 430

—, Auto-PEEP, high frequency jet ventilation, MANSFIELD, M., et al., (C) 430

Vomiting, antiemetics, Attenuation of emetic side effects of patient controlled analgesia, MACKENZIE, J. W., (C) 281

—, Attenuation of emetic side effects of patient-controlled analgesia, MACKENZIE, J. W., (e) 872

—, Effect of nabilone on nausea and vomiting after total abdominal hysterectomy, LEWIS, I. H., et al. 244-246

—, Influence of droperidol on nausea and vomiting during patient-controlled analgesia, BARROW, P. M., et al., (C) 567

—, Influence of droperidol on nausea and vomiting during patient-controlled analgesia, LEWIS, I. H., (C) 566-567

—, Laparoscopy and the laryngeal mask airway, BRIMACOMBE, J., (C) 121

—, Laparoscopy and the laryngeal mask airway, MALINS, A. F., et al., (C) 121
